

SAT Team

Introduction

"You learn something new everyday", We at SAT Team believe the learning curve is a life long event as each generation develops, and so do the techniques for learning. Using our experience, knowledge and technology, we have put together a system that allows us to team up with our clients to give unparalleled results in the area of learning.

1

Blended Learning

What is blended learning; it is the use of today's technology to access the courses of your choice, using most computers and mobile devices found in today's homes and office. Combined with direct contact with our trainer's forms the basis of a very powerful learning system.

Our courses are designed and built in such away to allow you to pick the best way for you to study using blended learning. This system also allows you to pay for each block as when you start studying that particular block or if you choose pay in full for the course on registration with us.

The next step is selecting the course that you want to take and registering that interest with the simple to use online registration site. On completion of registration and payment verification we will then send your course work to enable you to start your studies.

This educational programme with its proven method of learning along with the recognised qualifications gained will help you achieve and progress your career. This is done in a relaxed atmosphere enabling you to enjoy the experience and realise your goals.

The benefits gained will be twofold, firstly on a personnel level your career prospects and choices will be greatly enhanced and secondly employers gain by having staff with ISO/9001/2000 compliant qualifications accredited by Government recognised educational organisations

SAT TEAM

2

Product Liability

Product liability can be reduced using our learning management system. This is achieved by confirmed product knowledge which could be through a certified course.

The course is accredited using our unique certification recognised by government qualifying bodies. This reduces underwriters' exposure to product liability it has been welcomed by insurers and in turn reduced the clients' premium.

Staff training is a recognised tool for corporate retention add to this the ability to reduce corporate liability in respect of health and safety in the work place, we can include in a training regime either custom work place health and safety courses dealing with specific equipment or one of our generic health and safety in the work place course again reducing the risk of litigation to the company.

SAT Team can customise training packages to be added to our system which would include any legacy training that's required. Using our learning management system, in-house trainers have access to the same material, giving blended learning potential while standardising course work, thus achieving ISO or specific standards.

At a reasonable cost we can achieve a true training potential 24/7 that will not let you down. It reflects directly on your business, its performance and staff retention. We all know the cost of training staff and then losing them, using our unique system you can benefit from both situations, new recruits can be made profitable quicker and existing staff can be retrained and gain new skills.

If you have regular product updates or just occasional new ones, information may be required to be imparted to customers existing or new. This is a simple and proficient, cost effective method of disseminating information with a standard format or certified upgrade course, to assist your clients gain the necessary knowledge quickly and at their convenience.

The strength of SAT Team's learning management system is its simplicity to use with clarity within its reporting procedures. Add to this a user friendly interface to achieve optimum results. The system can have any number of users simultaneously utilising a very cost effective blended learning solution

Case Studies

Blended Learning is aimed at all learning and development specialists, as well as managers responsible for commissioning or advising on training. No prior technical knowledge is required.

- Identify opportunities for blended solutions
- Design effective blended learning solutions
- Calculate the cost implications of a chosen blended solution
- Describe a wide range of learning technologies
- Employ learning technologies appropriately within a blended solution
- Design and develop effective e-learning materials
- Design and implement effective online learning experiences
- Design and run live online events
- Overcome resistance to blended learning
- Successfully market a blended solution.

We currently run a training solution for BT using Sage ACT customer relations management software (CRM) This learning package is directed at the initial to interim user. This has successfully introduced us to the communications market.

Cisco has many varied products from VoIP phones through to large corporate switches. We have made available a full interactive learning course for Cisco VoIP phones allowing owners and users of these units access to a 24/7 trainer enabling frequent return visits and access to interactive information allowing the users to follow on screen whilst mimicking live i.e. the user can view and pause the copy the actions on the phone leaving messages or programming handsets and much more.

rutledgejoblink

Northern Irelands premier training and recruitment organisation, Rutledge Joblink have custom software for their recruitment side allowing any of their trainees either refresher or new to the software the ability to watch learn and retain in a interactive way. On their training side a full Blend-Ed package has been developed and rolled out given education to school leavers a more blended approach thus achieving all the companies' goals. We have also supplied administrative tools for tracking and reporting student achievement.

StirkLamont

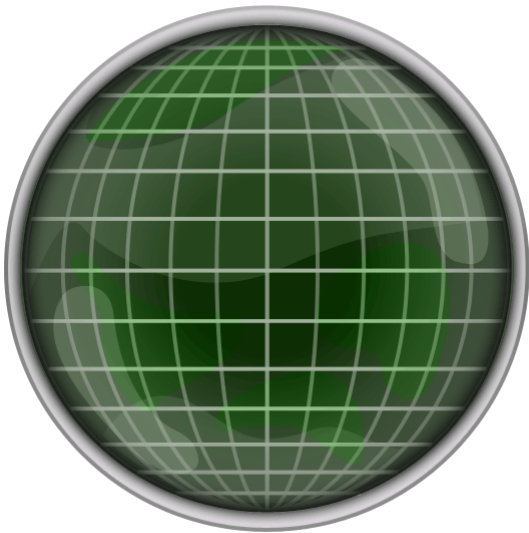

We currently run training software for Stirk Lamont Associates (SLA) using Microsoft Office 2007 and Microsoft Vista. The package includes Word, Excel, Access, Outlook, Publisher, Power Point, Infopath and Groove. We are also adding to the courses mentioned Microsoft one note, groove, info. Thus giving SLA the full gambit of Microsoft Office products together with the latest operating systems.

Grover Stewart & Associates We have been able to standardise an induction training course on behalf of GSA. As specialist insurance adjusters their product required alignment to insurance qualifications specific to their area of expertise. This by necessity had to include full health and safety in the work place training. Achieving a ISO9001/2000.
